World's Most Trusted Partner

Capture Integration has been built on a foundation of strong ethics, education, and a devout dedication to our professional relationships. Based on those ideals, we have created the strongest team of professionals in the photographic industry. Our goal is to establish long-term partnerships with our customers, not short-term fixes. The result is that Capture Integration has established an unprecedented reputation in the photographic field based on those fundamental core values. We appreciate you taking the time to look at this workshop and look forward to seeing you in Montana.

- Phase One Partner of the Year 2006 & 2010
- The recognized leading provider of medium/large format imaging solutions
- Core values of integrity, education and customer service
- Most dedicated, respected and knowledgeable staff in the industry

Advanced Landscape Capture One workshops will be held in the field and seminars.

Dave Gallagher
Capture Integration

• Equipment Requests

For your evaluation

- Digital backs
- Tech cameras
- Body or lens

• All-Inclusive

Workshop tuition covers

- Lodging
- Equipment loans

Best Software Instruction Available

Software is no longer an add-on to a workflow; it is an *integral* part of the workflow. Therefore during the workshop there are two classes specifically on Capture One Pro for landscape photography. All of the instruction will emphasize the importance of post-processing in the photographic workflow.

Capture Integration is known throughout the world as the leading instructors of the real world use of Capture One.

At the workshop we will focus on advanced techniques, however a complimentary introductory online class in Capture

One will be provided for those new to Capture One.

Hundreds of photographers have attended our Capture One Workshops across the country this year. We're very excited to include that same education alongside and in the context of the capture process.

Pricing

\$2950

(Workshop for 1; Single Occupancy)
