ENHANCING YOUR VISION THROUGH OUR EXPERTISE

Capture Integration

Enhancing Your Vision Through Our Expertise

In 2004, Capture Integration was founded by Dave Gallagher with these simple business principles:

- Provide an unparalleled level of customer service
- Give honest and ethical answers to questions that are in the best interest to the customer
- Truly understand the words: Dedication, Integrity, Partnership
- Know your product better than anyone else in the field
- Only sell and support products that you believe in 100%
- Make doing business with Capture Integration "easy"

These seem like basic ideas that, unfortunately, are missing in 99% of companies doing business in photographic retail. With these principles ingrained from the top down, it is easy to see how Capture Integration has had such success in such a short period of time. In September of 2010, Capture Integration was awarded the coveted "Phase One Partner of the Year" award for the second time in their short existence. Today, they are internationally recognized as the leader in their field and are the dealer of choice by the most demanding photographers from around the world. This small, dedicated team of experts, and the organization they are a part of, is used as the bench model of how business should be conducted in our new digital marketplace.

TEAM APPROACH

From its outset, Capture Integration has believed in the team approach. We believe a dedicated group with specialized training can solve your complex imaging needs better than a single individual can. We have assembled a team of energetic and enthusiastic consultants with a collective experience in professional photography solutions of over 200 years. We want to become an important partner in your business! Expand your business capabilities by relying on us for all of your projects and tap into the wealth of experience in our team.

EXPERIENCE

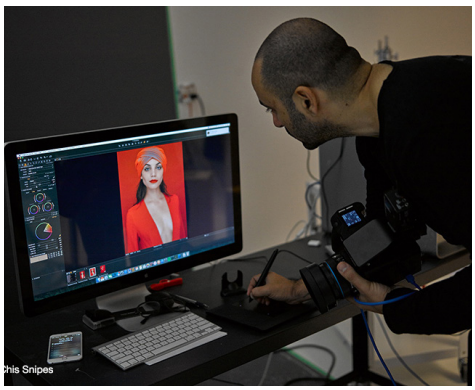
We have thousands of customers in our small marketplace. These customers call us and depend on us for their support. There aren't any problem situations that a photographer could encounter that we have not heard about already. Calling on Capture Integration as your photography consulting team will strengthen your company by finding effective solutions faster than you can on your own. Don't waste time struggling with an issue, searching online, or asking other photographers. Call us to solve these problems and have more time to get back to creating imagery. Isn't that the goal?

DEDICATED, PERSONALIZED, PRODUCT CONSULTING

In today's add to cart world, there is something missing from the buying experience. Buying from a box mover, you will not find someone who genuinely cares about what you do and who knows what solution is best for your use. Capture Integration was created to fill that void. Technology has exploded. There are more photographic choices today than ever. But there are subtle differences in these products with significant advantages and disadvantages that can impact your photography. Whether it is an extensive phone call, an exchange of emails, collaborative texts, or visiting one of our 4 locations for hands-on demonstrations, we will make the extra effort making sure you choose the best fitting solution that will contribute to your success.

IN-DEPTH KNOWLEDGE OF REAL WORLD EQUIPMENT PERFORMANCE

We don't work for the manufacturers, we work for you. This means you won't hear marketing hype or sales hyperbole from Capture Integration. Many products have variable performance in different situations that isn't reflected on data sheets. Many manufacturers overrate product capabilities. The only way to know a product's true performance is to use it and test yourself, and that is what we do long before we speak to our customers about any single product. We work with the world's most demanding photographers. Our years of experience working with our clients and supporting them have provided a tremendous depth of knowledge. Combined with our no-nonsense commitment to understanding technical expertise, you have an unbeatable team you can trust.



TESTING AND INSPECTION

Nothing is worse than purchasing or renting an expensive product, and having a problem right out of the box. We make the extra effort to make sure that doesn't happen. Capture Integration performs our own in-house testing. It is demanding. We extensively test pre-owned equipment before applying our CI Certification. We test and inspect rental equipment before and after rentals. We even go so far as to test and inspect new equipment that we receive from the manufacturers, before shipping to our clients. We don't leave our reputation in the industry to anyone else. Capture Integration has become the leader in our industry, and we are going to continue to work hard to earn that reputation for you.

ShotFlow

Software

ShotFlow One is an "operating system" for the modern, high volume photo production studio. Now you can plan, monitor, and measure your visual content production process from anywhere, on any device. ShotFlow One virtually eliminates spreadsheets and other data "silos" from your production workflow.

In addition, ShotFlow One automatically tags production data to content at the point of capture in the form of rich metadata, creating "smart assets." Now all the teams and channels that utilize visual content can leverage the power of "smart assets" in new and exciting ways to grow your brand.

Configured For You

Every high volume production studio has unique needs. No "off the shelf" tool can adapt to the specific requirements of a studio the way ShotFlow One can. We understand and can automate the complex interaction between product information, shots, sample merchandise, and image assets— through a seamless integration with Capture One.

Consulting Services

Want to improve image quality without sacrificing throughput? Lower your Cost per Shot? Optimize your studio processes? Reduce errors and time wasted chasing information? Capture Integration works with photo studios around the world to achieve more with less, and can bring best practices from our 100+ years of combined industry experience to work for you.

Capture Integration
MASTER SERIES

Serious Tech Training

Our team of Capture One and XF experts travels all over the map providing advanced Capture One Pro training. Come learn about the tips and tricks that will bring your workflow to the next level. This is serious technical training. Meet your local sales representatives and manufacturer representatives in respective cities, as well as play with new equipment, get your questions on digital medium format gear answered, and learn a solid foundation for Capture One Pro.

Education

Most training classes focus on today's issues, software incompatibilities, and glitches. Our training goes beyond today and goes in-depth on the underlying technologies, design, strengths, and weaknesses of cameras from Phase One, Mamiya Leaf, Canon, Nikon and the Capture One software package. You'll leave with a deep understanding of the way this program works under the hood, so that you'll become a better troubleshooter.

To learn when the next Serious Technical Training will be in your town, visit:
www.captureintegration.com/STT

Workshops

Our Masters Series Workshops are a combination of the finest photographic equipment in the world, in the most gorgeous locations, with the talent of our most exceptional clients as instructors.

To learn more about our upcoming workshops, please visit:

CI Client Reviews

ANDY LERMAN

LERMANPHOTO.COM

Taking a page from some current professional athletes, my success is based on a "we" concept, not an "I" concept. I am only as good as my support team. My family provides wonderful emotional support that gives me the confidence to explore. In 2014, I met Chris Snipes at Photo Plus Expo in New York and discussed with him my thoughts and my needs. I met with others at that time, too. Chris and I hit it off perfectly and he knew exactly what I was after. He was timely, responded to all my concerns and provided me an opportunity to test equipment without pressure. Since then, Chris and the rest of the CI team have been a never-ending source of professional support, from getting answers to technical questions and getting repairs performed, to making sure that I am fit with the right equipment. With such a great support mechanism, how can "we" not create beautiful, thoughtful, dynamic, emotional photographs?!

EDWARD COHEN

BOCATERRY.COM

After buying my first system from Capture Integration and meeting all of the support staff, there was no turning back. No matter what the issues are or wanting to try out new equipment, Capture Integration has the organization to support you. They have great people working for them (i.e. Chris, Brad and Cam) and are always willing to go out of their way to help you.

ADAM EWING

ADAMEWING.COM

My old studio mate was using Capture Integration as his camera vendor, and turned me onto them. Being able to call Chris Snipes and talk to him personally about what would work best for what we need has been invaluable to me. Always great customer service.

JEANNINE HENEBRY

THEHENEBRYS.COM

When I met David Gallagher and his team in Carmel on the Ken Doo / Don Libby Anti Workshop last year I knew I have found a home. The Capture Integration team is super helpful, patient, and always available. Last year shooting at sunrise in Yosemite, Cam Williams in the technical department was just a cell phone call away to help me navigate a problem I was encountering.

ALISTAIR TUTTON

ALISTAIRTUTTON.COM

A few years ago I was in the position to jump into medium format, and the one consistent solution in that field for me had been Capture Integration. They had presented seminars in Kansas City, they had come to meet with me, invited me out to workshops and that was fantastic. My schedule finally opened up and I was able to attend a workshop. I spent three days in Montana with Jeffrey Jacobs showing me how to really light architectural imagery and getting all kinds of hand-on experience with the best equipment in the world. After that I was hooked; I knew that Capture Integration would really be the partner to work with me on selecting the right equipment and supporting me with all the technical needs I have.

DANA NEIBERT

DANANEIBERT.COM

The biggest factor with high-end equipment is finding a partner with great support and a great relationship with the manufacturer. Otherwise, it really wouldn't matter where you get your equipment and the only factor would be finding the best price. With Capture Integration I know that the guys on the other end of the phone have a ton of knowledge on the gear and are not just a salesperson that only knows what's in the handout literature.

Rental

QUALITY ASSURANCE

EXPERT SUPPORT

As the authorized dealer of Phase One, Mamiya Leaf, Alpa, Hasseblad, Leica, Canon, Eizo, Cambo and more - we aren't just renting equipment; we know the equipment inside and out. We are often called by rental companies when a problem arises they can't resolve. This support begins even before your rental starts. Our staff will be happy to provide basic training on any equipment you rent, either immediately before the rental, or at another pre-scheduled time. If you'd like more in-depth training we can include that as part of a rental package.

PROFESSIONAL EQUIPMENT

Every item is checked before rental to make sure it is clean and in top working condition. As dealers, we know what to look for to ensure the equipment won't fail on you.

TRY BEFORE YOU BUY

PRO-RATED RENTAL REIMBURSEMENT

Capture Integration also sells all of the products listed in this brochure. Please feel free to use a rental as a way of evaluating a potential purchase in your real-world workflow. If you purchase after renting part of your rental will be credited toward your purchase:

Within 1 week: 100% of your rental will be credited
Within 2 weeks: 75%
Within 3 weeks: 50%
Within 4 weeks: 25%

***Local Atlanta rental pickup rate is 10% OFF the listed rates**

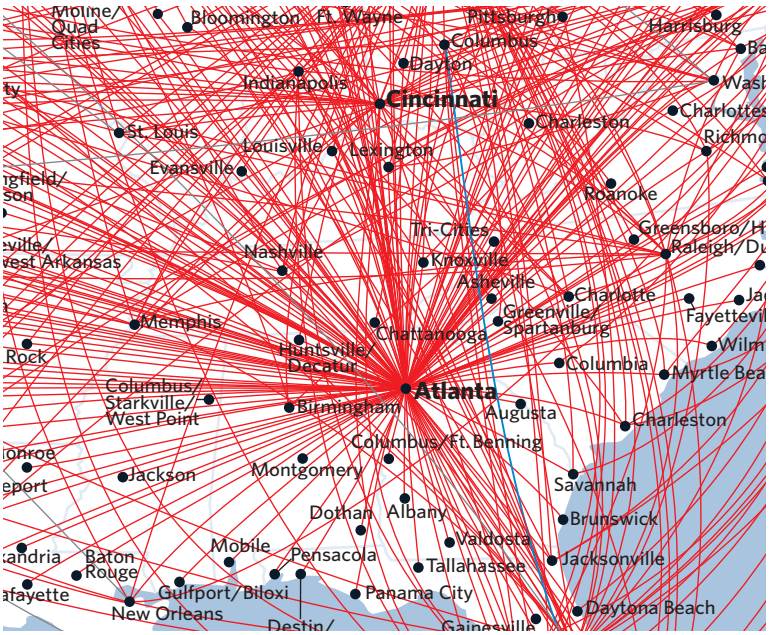
SHIPPING

We ship rentals nationwide using insured FedEx Priority Overnight or insured FedEx First Overnight; and begin charging the next day - when the equipment is in your hands. For example, if we ship the equipment on Monday it will arrive on Tuesday morning - Tuesday would count as a rental day, but Monday will not. The cost of shipping to the client is added to the rental invoice. The client is responsible for shipping the equipment back to Capture Integration to arrive before 10am the day after the rental. For instance, if the equipment is shipped back to our office on Wednesday and arrives Thursday before 10am, then Thursday is not charged as a rental day.

Do you need it the same day?

DELTA

We are the only dealer that can provide same-day delivery. Did your lens go down on set? Do you need a back-up camera or cable? Capture Integration is a certified Delta Dash shipping agent - utilizing airport-to-airport service. We can deliver equipment same day - 100% guaranteed across the United States. DASH shipments have the highest boarding priority and fastest transit times of any Delta Cargo product.



Same Day Delivery

100% Service Level Guarantee

Power in all the right places

Profoto B1X

The Profoto B1X improves on the B1 in three significant areas: power, power and power. A more powerful modeling light, a more powerful battery and extended HSS power range. Add to that two new OCF reflectors and you'll find with the B1X, we've redefined the on-location flash yet again.

Discover the B1X at profoto.com/us
