Neutral NYA-EVO / Phase One Co-Branding

Protective Foam

Stretch fabric pocket on the waist belt

Hypalon® base.

Phase One NYA-EVO Fjord 36 Backpack #60900114
For alternative colors please check www.nya-evo.nu

The NYA-EVO Fjord 36 backpack's compact size holds 36 liters of gear and complies with most flight 'carry-on' sizes. With a full-size aluminum frame, highly water-resistant and durable materials, the rugged NYA-EVO Fjord 36 all-rounder pack is up for any adventure. Top quality components, tested in factory and field, brings you worry-free performance at any time.

The Phase One NYA-EVO Fjord Backpcks offers you:
Peace of mind - keeps your camera equipment safe from the elements.
Comfort - aluminum frame and ergonomically designed shoulder straps make you feel the load inside the backpack much less, carrying 15kg with ease. Back padding body contact fabric is quick drying, soft and non-abrasive.
Ease and adaptability - three sizes of Removable Camera Insert - see below.
Versatility - for dynamic adventure sports as well as the urban jungle and general traveling. With carrying points for skis, snowboard, helmet, rope and ice axe, emergency whistle plus the ability to carry 15 inch laptop and other general travel gear.
Stability - our load stabilizer system moves weight to the frame and the frame transfers it to the hips

Construction
High weather resistance provided by a combination of a thermoplastic polyurethane coated nylon fabric and polyurethane coated YKK® Aquaguard® zippers. In extreme conditions a seam-taped detachable rain cover can be attached for an extra protection barrier.
Lightweight aluminum T6-6061 tubular frame combined with the use of high density foam covered with quick dry soft knitted fabric provide for optimal load management and carry comfort.
Rear panel zipper provides full access to the main compartment for easy packing. This configuration has the extra benefit of having the zipper close to the body for anti-theft security and keeping your shoulder straps out of the dirt during access.
The pack is equipped with a removable internal separator that divides the camera gear from the 'other gear'. This prevents unwanted items from the 'other gear' section to slide into the camera compartment.
Compression & gear attachment straps for carrying equipment onto the exterior of the pack. The tensioning of these straps pull the load onto the aluminum frame for optimal carry comfort and stability during dynamic activities.
The pack comes with a Hypalon® base which is extremely tough, waterproof and longwearing.
Lightweight detachable seam-taped raincover included.

Organization
Main compartment accessible from rear and top.
Roomy quick access front pocket with inside organizer that serves multiple functions depending on the activity. For backcountry it fits most snow shovels, avalanche probe and small tools. For hiking & general travel it fits travel books (up to A4 in size), extra layers, small accessories and most 15 inch laptops in the padded sleeve. This sleeve doubles up as hydration system compartment.
Stow-away stretch mesh attachment that can be fixed to

loops on the outside of the pack. This system can used attach bulky items like helmets, sleeping bag, jackets or extra layers and is stored inside front zip top pocket.
Stretch fabric side pockets give space even when the bag is fully stuffed.
Stretch fabric pocket on the waist belt.
Internal organizational compartments for small camera accessories (memory cards, filters, etc) on the interior rear access panel.
Two internal zipper mesh pockets for storage of small camera or travel accessories.

Attachments
Hiking poles, ski poles and ice-axes on the front panel by bungee cord and webbing loop system.
Snowboard or snow shoes on front panel.
Skis with both vertical and diagonal carry options.
Helmet attachment system on front or top panel of the pack.
Sleeping bags and mattresses on the sides, front or top of the pack (using helmet attachment system)

Materials
Nylon 210 Denier Rip-stop fabric with thermoplastic polyurethane film on interior and water-repellant coating on exterior of the backpack.
Polyester 200 Denier lining fabric with polyurethane coating.
Soft touch quick dry knitted fabric for all contact points to the body.
High density closed cell foams for suspension system.
Glove friendly aluminum zip pullers and Woojin® plastic side release buckles.
Outside zippers are all YKK®. Heavy gauge for rear zip and Aquaguard® zip for top and front zippers.
Nylon webbing.
Hypalon® base.

RODENSTOCK

Phase One NYA-EVO RCI-C Carry-on bag w. Shoulder Strap
Part # 60900119

Lens Cast Calibration Kit 140 x 140mm incl. Neoprene pouch (included with the XT IQ4 Camera Systems)
Part # 73239

With the super high quality large sensor and premium optics, there may still be a need for neutral color calibration, especially with wide angle lenses, and when using shift. Under these circumstances images may suffer from a slight colour cast caused by the the difference in light hitting the sensor from one side to the other.

This can be easily calibrated out by shooting a reference image with a white opal LCC calibration plate in front of the lens. The solution comes Included with the XT Camera System

**IQ4 Remote Release and Break Out Box B.O.B.**
(Optional Accessories)
The remote release and Break Out Box B.O.B. is a high quality remote release, that also can function as a break out box for older Phase One 645AF accessories with an 8-pin multiport.

It can be used with the coiled cable as a smart little remote release or it can be used with the XF Camera System with a short 10cm or 2M straight cable and a power supply if you are in a studio invironment and want power in to the XF at the same time. (this is however not possible with the XT and the IQ4)

On the XT Camera System, the B.O.B. connects to the IQ4 12-pin multiport, and allows an additional 8 or 12 pin release cable release to be attached to extend the reach of the cable.

Part#	Description
73130	IQ4 Cable Release and Break Out Box "BOB" (Including coiled cable 30cm)
50300232	Cable Release "BOB" Coiled cable 30cm (included with "BOB" package)
50300220	Cable Release "BOB" Straight cable 10cm (5mm cable thickness incl. XF power connections)
50300231	Cable Release "BOB" Straight cable 2M (5mm cable thickness incl. XF power connection)

30 cm Coiled Cable supplied as standard

Release button with half press function

Rubber Port Covers

Hähnel Remote Shutter Release HRX 280 PRO for Phase One IQ4 (Optional Accessories)
In Addition to the B.O.B Phase One also have available a Hähnel Remote shutter release, that features 2,8m cable for triggering the IQ4. The Hähnele cable release is compatible with both IQ4, XF/DF camera and the B.O.B.

Hähnel Remote Shutter Release HRX 280 PRO for the Phase One IQ4 Part# 73203

Profoto Air Sync Transceiver
(Optional Accessory)
The Profoto Air Sync Tranceiver can be used as an XT wireless flash transmitter if you are using Profoto flash with a build in receiver.
The Transmitter connects to the IQ4 flash sync port.

Profoto Air Sync Tranciever (Reciever unit for use with other brand flash systems) Part# 70263

IQ4 Batteries and Battery Charger

XT Compatible Accessories

Accessories from Cambo that are compatible with the XT Camera System

The XT Camera Body have a hidden accessory shoe on the left hand side featuring a 3/8 threading plus a Cambo compatible Accessory mount.

Unscrewing the cover with the supplied Torx6 key, reveals access to this shoe.
Although not very practical for handheld shooting because of the position of this shoe at the handle, there may be special applications where this comes in very handy

3/8 Threading

Cambo Compatible
